## [how to adjust the carburetor on a 40 hp mercury 2 stroke](#)

Adjust the Carburetor on a 40-HP Mercury 2-Stroke Outboard The parameters for adjusting the carburetor on a Mercury outboard involve both the idle speed screw that controls the motor's speed at idle, and the mixture screw that controls the fuel-to-air ratio.

## [how to adjust the idle on 35 hp mercury outboard gone](#)

Adjust the Idle on 35-HP Mercury Outboard Adjusting your 35-HP Mercury outboard's idle is more than turning the idle speed screw; you also have to adjust the throttle cables and the cam follower. The extended time required for this process means that a flushing attachment may not supply enough water to avoid engine damage.

## [outboard boat engine wont stay running adjust idle screw very easy](#)

Outboard Boat Engine wont stay running - Adjust Idle Screw - VERY EASY

## [1965 1989 mercury outboard idle mixture adjustment](#)

IDLE MIXTURE ADJUSTMENT. The idle mixture and idle speed are set to factory specifications from the manufacture. However, over time periodic adjustments will be necessary for optimum performance. When making adjustments to the carburetor, it may be necessary to adjust the carb settings while the motor is running in a test tank or out on the water.

## [how to adjust carbs on an outboard motor it still runs](#)

Locate the idle speed stop screw on the carburetor linkage. You will recognize it by pulling back on the throttle linkage and seeing where a small screw rest against a cam. The screw will have a throttle return spring very close to it. Look up the idle speed specifications for your outboard in your service manual.

## [adjust idle speed setting mercury outboard manual download](#)

2001-2002 Mercury 115 HP Service manual application: Mercury Outboard motor 01-02 Mercury 115 HP (115HP) EFI (Electronic Fuel Injection) outboard engine. 4 Cylinder InLine, 4 Stroke DOHC, 16 Valves. Starting Serial Number 0T178500.

## [carb settings for a 40 hp mariner page 1 iboats boating](#)

Re: carb settings for a 40 hp mariner It was originally at 4 and 1/2 turns out from the needle seating. Could this be why I usually go through a couple sets of plugs in a season? Also, the top screw isn't really a needle valve it is just a screw to adjust where the throttle can be at it's lowest.

## [zman s outboard motor guides carburetor adjustment](#)

Mercury Carburetor Adjustments . For carburetor adjustments to these motors, the repair manual suggests to loosen the idle screw to 1 1/4 turn out. The actual procedure will differ or the amount that is suppose to be

out is slightly different for each different motor. I find that the process is the same.

[90 hp carb idle adjustments page 1 iboats boating](#)

Supreme Mariner Join Date: May 2008; Posts: 14512 #2. November 23rd, 2011, 03:55 AM. Re: 90 hp Carb idle adjustments. Need serial#s. The three carbs are all basically the same. The air screw is set on each one. ... Final idle speed adjustment with the 'main' idle speed screw is then finished, again, while IN gear on the water. Comment.
